NÚMERO DE AULAS POR SEMANA: 02

NÚMERO DE AULAS POR MÊS: 08

SEMANA 7

Bom dia, boa tarde, boa noite, boa madrugada... não sei a hora que você está me “lendo”, mas o importante é que você está me “lendo”.

THE BRAZILIAN FISCAL STABILIZATION PROGRAM

The first component of the Fiscal Stabilization Program encompasses the approval of constitutional and legal reforms in areas such as social security, labor, public administration and taxes as well as the introduction of a Fiscal Responsibility Act, addressing fundamental fiscal issues at the three levels of government (the Executive branch, Congress and the Judiciary).

The second component is the Plan of Actions for 1999-2000 which fulfills the commitment of President Cardoso to present a medium term fiscal program aimed at stabilizing the debt/GDP ratio. It was formulated with the purpose of guaranteeing stabilization, creating the necessary environment for growth as well as protecting the Real against speculative market pressure. Measures contemplate the reduction of budget expenditures as well as revenue increases. They should create the basis for a reduction of interest rates in a short period of time. Particular attention is attached to the main cause of fiscal disequilibria, namely, the social security deficit at the three levels of government.

QUESTÃO 1 - According to the text, constitutional and legal reforms...

- a. could have been included in the Brazilian Fiscal Stabilization Program.
- b. have been imposed by the international Monetary Fund.
- c. would have to be reformulated by the three branches of the government.
- d. have been monitored by public and private servants.
- e. have been included in the Brazilian Fiscal Stabilization Program.

QUESTÃO 2 - A Fiscal Responsibility Act was...

- a. banned
